Team Name: sddec21-14
Team Members: Aaron Goff, Dakota Berbrich, Nolan Jessen, Noah Berkland
Report Period: Feb 2-14

Summary of Progress in this Period

During this period, we have met with the client (Doug Jacobson) in order to better understand the finer details of the project, timeline, and expectations of the end-user. Additionally we have set up a communication system, using Discord, that allows the team to communicate quickly and efficiently with each other. The client has also requested access to the Discord server which has been very beneficial thus far.

Pending Issues

Current pending issues are simply waiting for the hardware to be delivered to the client which will then be picked up by each individual student so that design and development can begin. We also need to strengthen our understanding of Python and how to simplify the high level concepts of coding so that it can be understood by highschoolers who have never programmed before.

Plans for Upcoming Reporting Period

For the upcoming reporting period we will be evaluating the hardware systems that are being delivered and finding the limits of said hardware in order to come up with designs and projects for the end-user to implement.
